December 2024

BART to begin canopy construction over the final Embarcadero station entrance between Beale & Main on Market Street

Community Stakeholders:

In mid-January 2025, BART will begin construction of a new entrance canopy over the station entrance on the south side of Market Street between Beale and Main Street.

Prior to the start of canopy construction, the contractor will install a chain link fence on the street level surrounding the station entrance near the corner of Main Street and Market Street. The fencing will extend down the block toward Beale Street. All public access to that station entrance will be closed at both the street and station levels for the duration of the project. There are currently five alternative Embarcadero station entrances accessible to the public. The canopy construction at this location is anticipated to begin in mid-January 2025 and will be complete in eight months.

The chain link enclosure surrounding the work site will allow visibility from the street for the safety of pedestrians using the sidewalk. The contractor will establish a 7' ft. pedestrian pathway between the work enclosure and the building frontage along Market Street. The work enclosure will remain in place until canopy construction has been completed.

Construction hours during the weekdays will be from 7am to 7pm. There may be the need for occasional weeknight work from 8pm to 5am. No weekend work is planned at this time, however the contractor may schedule it if necessary. Construction-related noise will not exceed contract and permit limits. Construction equipment used at the site will include crane, forklift, compressor, rivet buster in combination with other hand tools to complete the work and some of this equipment will be stored inside the work enclosure as needed. In the beginning of the project there will be demolition work to remove the existing entrance walls. The canopy contractor will be responsible for daily site maintenance and graffiti removal on the work enclosure and project-related signage.

BART is constructing a total of 21 street-level canopies over downtown station entrances. BART has completed construction of 13 units (including 2 pilot canopies) with 3 more canopies currently under construction and additional canopies to be constructed through 2026. These entrance canopies will protect the new escalator equipment and

reduce maintenance costs. In addition, canopies will include wayfinding, lighting, real-time information, and security cameras on Market Street.

Simultaneously, BART's Escalator Renovation Project is replacing 41 escalator units in the four downtown stations at both platform and street levels. These escalators are original to the BART system and have outlived their expected mechanical life, frequently requiring repairs. To date, BART has completed installation of 16 units, 3 are currently under construction, and there are 22 remaining escalator units to be completed through 2026.

Thank you for your patience as we work to complete this important project.
